FME 2016.1 Launch: It’s Awesome.

At a glance:

- Connect to more cloud systems like Dropbox, data analytics packages like Tableau, NoSQL databases like MongoDB, and the latest new formats like Apple Venue Format.
- Improvements to FME Workbench to help you build cleaner, more streamlined workspaces.
- Web connections flow seamlessly to FME Server.
- Dashboards to monitor your FME Server and FME Cloud instances.
- More control over FME Cloud instances.
- FME Hub has arrived.

Let’s take a look in more detail.
Problem

Report on construction projects – data delivery

01/09/2016

Sources

● Excel-sheet – list of projects
● Project HUB – collection of projects with metadata
● Object list – list of object types relevant for a project
● TNE – Segmented data from the National Road Database
Geometry and date

- Filtering data on geometry and date
  - Geometry vs. Linear geometry
  - Project build finish date vs. Today’s date
Trial and error

- smaller filesize?
- two leaflet maps in one HTML-page?
- make it dynamic?
